

Workshop:

Advanced Adobe Captivate 3

Instructor:

Neil Perlin

Length: *1 day*

Location	Dates
Web-based-live	October 8th

Workshop Description

From its humble beginning as RoboDemo, Captivate has become a powerful and feature-rich tool that offers multimedia, eLearning, and other advanced features. This course builds on the introductory Captivate course to look at these features, including the esoteric ability to create movies that can be viewed on handheld devices. Yet with all this power, it's still inexpensive and quick and easy to learn compared to most similar authoring tools.

This one-day, hands-on seminar is aimed at technical communicators, trainers, training developers, marketing staff, and anyone else who needs to quickly get up to speed on the advanced features of Captivate. The prerequisites are either a working familiarity with basic Captivate operations or taking the basic Captivate course.

About the presenter

Neil Perlin, owner and principal consultant of Hyper/Word Services, entered technical writing in 1979, began creating online documentation in 1985, and is now an internationally recognized expert in Windows Help and online documentation design and development. He has been providing online documentation training for 14 years, is a popular speaker at various computer user groups and STC conferences, and is the organizer of the "Beyond the Bleeding Edge" stem at the STC annual conference.

Registration Information:

Fees and Discounts: The registration fee for this workshop is \$295 and includes tuition and course materials. Group discounts are available. All fees are payable prior to the start of the seminar.

Cancellation and Refunds: Your tuition is fully refundable if you cancel within 14 days of the seminar. There is no charge for substitutions. UserEdge reserves the right to cancel a course (with full refund) due to insufficient enrollment.
